

COVID 19 INTUBATION SHIELD

THIS DEVICE OPERATES AS A SHIELD TO PROTECT PHYSICIANS FROM POTENTIAL EXPOSURE TO AEROSOL PARTICLES RELEASED FROM A PATIENT'S AIRWAY DURING INTUBATION.

- Covers the patient's face and provides two holes for the physician's hands to work through from the top of the bed
- Manufactured using clear polycarbonate or acrylic
- Reusable - requires disinfection after each use
- Two options available
 - Fully sealed at all edges and ships assembled and ready to use
 - Ships flat and requires easy assembly (instructions and hardware included)
- Designed by an anesthesiologist in Taiwan, based on a request for additional protection for physicians during endotracheal intubations

Swift has been an Ontario based automotive parts supplier since 1997 and is ISO 9001:2015 Registered and holds a Health Canada MDEL Licence.
